

The Secret Calendar Codes

Humanity in the Cosmic Cycles of Time

“An astonishing, easy-to-read book that challenges our deepest assumptions about TIME, and shows how to blend ancient wisdom into modern life.”

How did ancient traditions measure celestial movement and time?

What is our current position in the Precession of the Equinoxes, the larger cycle that rules the rise and fall of consciousness?

What do the ancient calendars, prophecies, modern scientists, spiritual leaders and mystics all tell us about this amazing TIME?

They say “NOW is the TIME.”

They say humanity is at a critical mass turning point.
As change continues to accelerate, we are offered a choice
and a quantum leap into the unknown.

How to Read this Book

This book is a fresh view of reality. I invite you to read it slowly one page at a time. Take it slowly and read it in bits as there is much new information. Absorb each concept into your body and heart, and notice how you feel. The book draws together many diverse threads. To see the whole picture clearly it is best to view each slide in order to the end.

*Read the book slowly,
one page at a time.*

To read more easily in Full Screen mode, click on **‘menu’** on the lower left of the window and select **‘View Fullscreen’**. To exit from Full Screen click your **Esc** key.

To move forward or back click the **arrow** on the screen or on your keyboard. Some browsers can also move forward and back with a little hand on the side of the screen.

To move through the book quickly some browsers have **Thumbnail tabs** in the lower left corner of the window to help move through the book quickly.

To download the book, select that option on the menu. Printing is not recommended as it is more readable on-screen, and printing uses a great deal of color ink.

A Passion for Truth Guides this Book.

This book assembles the pieces of a puzzle to form an integrated world view.

*"The light is the only thread to follow."
Helen Keller*

This book connects threads of information in a new way. It is the result of immense research from books, online and channeled sources.

If you are used to relying on public media for information, much of this material will be new to you. I suggest you allow your body and heart to absorb each concept slowly one page at a time, noticing how you feel.

If you observe that your mind, body or heart are closed, then put the book down. It is better that you pick it up another time when you are more open.

I do not ask that you believe all that is suggested on these pages, but that you consider the possibility of its truth.

I hope this information helps you connect your own threads in a new way.

What Do the Calendars Tell Us?

We Have Many Questions.

- What's happening NOW in the cosmic cycles of TIME?
- What do the ancient calendars, prophecies, modern scientists, spiritual leaders and mystics say about our current TIME?
- What secrets do the oldest writings and symbols tell us now?
- What does the new quantum physics have in common with ancient calendars?
- What does NASA say about changes on the Earth and in space?
- What is behind the power struggles and polarization we see around us?
- Where did our calendar come from?
- How does our modern calendar separate us from the harmony in Nature?
- Is TIME accelerating? What does this mean in our lives?
- If our ancestors had advanced math and astronomy 10,000 - 75,000 years ago, how old is civilization?

Is TIME Accelerating?

How can we prepare for Earth energetic changes?

What is essential about 2012 and the Mayan Calendar?

This Book Proposes:

1. The ancient calendars tell us our human heritage is much older and more diverse than we have been taught. A vast body of knowledge is coming into our awareness. We give it names like new age and quantum physics, but it is actually very old, and has been lost, forgotten or hidden for a long time.
2. Right now energetic forces in the galaxy and our sun are heating things up in our entire solar system, including Earth. There is growing awareness, excitement and polarization on the planet. This period, and 2012 in particular, could be a shift that will determine in an important way the future of the Earth and humanity.
3. The first calendar inventor, Hermes, said “As above, so below”. This means the universe is holographic. In other words, the universe is infinitely small and the infinitely large, and these two infinities are connected within us.
4. Time, and the world we perceive with our five senses are a small reflection of an infinite world we cannot see. To observe the whole picture we need to move beyond the basic five senses to a larger multi-dimensional reality.
5. We always have a choice in how we respond to new information:
Fear or Love. Closed or Open. Me or We.

What is the Most Advanced Civilization of all TIME?

Modern?

Our Modern Age represents great material and electronic advancements. We also create war, disease, planetary destruction and confusing priorities. How advanced is that?

or Ancient?

What are the undiscovered secrets of the ancient world? What messages are encoded in the stones and symbols? What do they tell us?

We Presume that We are the Pinnacle of Civilization,

much more advanced than our ancestors.

The ancient calendars point to highly sophisticated civilizations, math and astronomy. Our ancestors were wise, and they understood their place in the cosmos.

Much has been forgotten or lost.

Now is the time to rediscover the truth.

Scientists, spiritual leaders and mystics have much to offer us now. How will we integrate modern truths into the ancient wisdom, begin to live in harmony with Nature and join the quantum world of life that is all around us?

The oldest written calendar points to an advanced culture in Egypt?

The Hindu calendar tracks a cycle of civilization every 25,714 Years?

concepts of TIME.*

?

Galileo Galilei – 1564-1642 Italian physicist, mathematician and astronomer is called the “Father of modern science.” Galileo taught that the Sun is the center of the universe. He was put on trial by Roman Catholic Inquisitors, forced to deny his work and spent the last 10 years of his life under house arrest. [Learn More](#)

What is TIME?

Time is movement in space, the orbits of the Earth, Moon and Sun.

Days

*The Earth rotates on its axis.
Each day.*

Moon Cycles

*The moon orbits the Earth
every 29.53059 days.*

Years

*The Earth orbits our Sun
every 365.2422 days.*

The Earth's natural rhythms are orbits. This creates Days, Moon cycles and Years.

Our ancestors were skilled astronomers. They measured these orbits and made practical calendars. Earth's solar cycle is quite different from its lunar cycle. A solar year has 356.2422 days. A moon orbit has 29.53059 days.

Our ancestors invented 3 types of calendars:

1. Lunar calendars follow the moon's phases only.
2. Lunisolar calendars follow the moon cycles, adding an extra month periodically to match the year.
3. Solar calendars have a 365 day year and disregard moon cycles. We add a leap day every four years.

TIME is the Movement of Spheres in Space.

All Celestial Bodies Move in Spirals, never straight lines.

*I feel dizzy.
Which way
is up?*

As the Earth revolves on its axis, it also orbits the Sun. The Sun and solar system are also moving. Each orbit is a 3D wave or spiral.

*Why is this important?
Because each moment in TIME is a new position in the space-time spiral. WE NEVER return to the same point. TIME, the COSMOS and our REALITY are expanding, ever changing, constantly in motion! [Learn More](#)*

Once Upon a Time

Mankind Lived by Nature's Rhythms.

Many ancient cultures viewed TIME as a circle without beginning or end.

Nature's cycles guided every aspect of life. People lived by the rise and set of the sun. Time was defined by Nature's cycles of day, night, moon phases and seasons. Our ancestors marked the years by celebrating solstice and equinox, dates that mark the four seasons and the New Year. [Learn More](#)

Where do I find this place?

Nature's rhythms still pulse inside us with our breath and heartbeat.

Our daily circadian rhythms follow the sun and moon.

The sun and phases of the moon guide our energy levels, moods and sleep. When our body rhythms are in sync with Nature, life flows easily. Knowing your personal cycle allows you to cultivate the best hours for your own bio-rhythms. The result is balanced, stable energy, a serene mind and deep sleep. This timeless and intimate contact with the Earth nourishes our health and natural harmony.

[Learn More](#)

Electricity has Changed our Experience of TIME.

The advent of electricity now allows us to be separate from Nature. We no longer wake up with the sun, and we can stay awake very late. We can live disconnected from our natural rhythms. Many people live busy schedules without ever seeing the sun, moon or stars. Our pace is driven by our minds and thoughts, separated from the natural biorhythms of Earth's cycles: day, night, seasons and moon phases. [Learn More](#)

When we disregard Earth's cycles, we live out of sync with the rhythms that govern all life. Many children never feel the harmony of living in tune with their own natural circadian rhythms. The resulting loss of equilibrium is the root cause of many diseases. [Learn More](#)

Chapter 3:

‘The Great Year’ is Earth’s 25,800 Year Cycle.

*NASA defines The Great Year as
“The period of one complete orbit around
the ecliptic, or about 25,800 years.
This is also called the Platonic year or the
Precession of the Equinoxes.
Is it caused by a wobble or an orbit?*

What does this mean?

[Precession NASA Definition](#)

[See Video](#) “The Great Year”

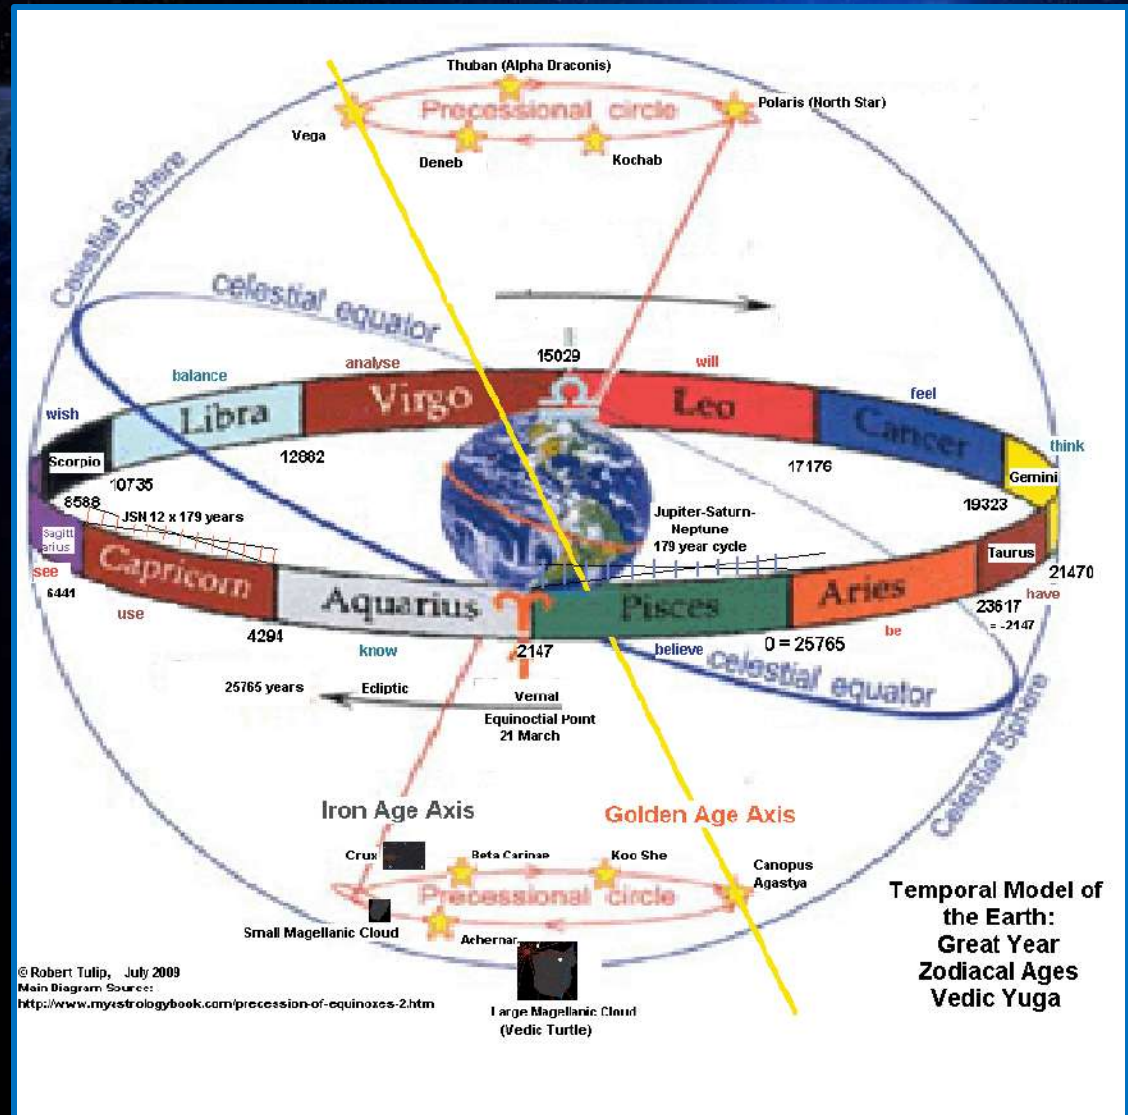

The Earth's 'Great Year' has 12 Zodiac Ages.

The "Great Year" is a 25,800 year cycle with 12 zodiac sub-cycles or **Ages** of 2,150 years each.

The Shift to the Age of Aquarius is in transition NOW. We are ending the **Age of Pisces** and starting the **Age of Aquarius**. In simple terms the **Age of Pisces** saw the rise of Christianity, and the **Age of Aquarius** is defined by unified truth and brotherhood.

No one agrees on the exact beginning date of these Ages.

[Learn More](#)

The 'Great Year' Moves Backwards Through 12 Zodiac Ages.

This cycle is called Precession of the Equinoxes.

Ancient astronomers found the Great Year by observing sunrise at the spring equinox each year in March. On the horizon appears one of 12 zodiac constellations: Aries, Taurus, Gemini, Cancer, Leo, Virgo, Libra, Scorpio, Sagittarius, Capricorn, Aquarius and Pisces. They observed a new zodiac sign on the horizon every 2150 years!

A complete "Great Year" cycle is 12 zodiac ages of 2,150 years, or 25,800 years.

They also noticed that the cycle moves **backwards** through the zodiac signs! A complete cycle of 12 periods of 2,150 years is 25,800 years. Each year's position 'precedes' the previous year. Isaac Newton called this cycle The Precession of the Equinoxes, to describe this reverse movement. [Learn More](#)

What Causes the Great Year?

Is it a wobble? Or does the Sun orbit with other stars?

Isaac Newton believed that ***The Great Year*** is caused by a wobble in the Earth's axis as it rotates. Most modern scientists agree.

What is a wobble?

Is it a wave? A spiral? An orbit?

Ancient calendars observed that our Sun and solar system move through the galaxy in an orbit with other stars including ***Alcyone*** in the ***Pleiades***. They noticed that as we move closer to or farther from the magnetic center of the galaxy, energy and light bring changes in culture and consciousness on Earth.

Ancient cultures believed that the Great Year brings powerful electro-magnetic rays from the galactic center, and this rules the rise and fall of civilization.

Is it a Wobble or Orbit? Which is true??

The Greek, Inca, Chinese, Hindu, Egyptian, Mayan and Hopi cultures all use the ‘Great Year’ cycle.

The Hindu calendar has *Yugas* or ages: The Golden, Silver, Bronze and Iron Ages total 25,714 years. Yugas define the rise and fall of civilizations in a never-ending cycle.

The Hopi calendar says humans have existed in three ages. In each age we turned away from spiritual teachings, and the world was destroyed. The first world was destroyed by fire, the second by ice and the third by water. We are now at the end of the fourth age.

The Mayan ‘Long Count Calendar’ of 5125 years is one-fourth of a precession cycle of 25,625 years. The Mayans measure many cycles from 16.4 billion years ago. [Learn More](#)

The Hebrews knew about precession in the time of Kings David and Solomon, as evidenced in the Psalms of David 19:4-5, that trace the zodiac through each age. [Learn More](#)

Chapter 4: The Sumerian Calendars, Roots of our Modern Calendar

Hi, I am Gilgamesh.

To find the origin of your modern calendar, you must go to the Sumerian tablets in present-day Iraq 6,000 years ago.

The Sumerian tablets are the oldest surviving written books. Sumerians lived in the once lush fertile crescent in present-day Iraq.

Gilgamesh c. 2700 BC, King of Uruk, (pronounced 'Iraq') was the son of the goddess Ninsun and a man Urlugal. He was said to be half man, half god.

[About Gilgamesh](#) [Learn More](#)

The Sumerian Calendar Used Base-60 Higher Mathematics

Sumerians were skilled astronomers. Sumerian math is based on the number 60. 8,000 years ago they used base-60 numbers with decimal places to calculate precise movement of the planets. Sumerian years were counted in 60-year groups, much like our centuries. This is why we now count 60 minutes in an hour and 60 seconds in a minute.

Sumerians (5,000 BCE-1,700 BCE) had a 12 month lunar calendar. [Learn More](#)

Months followed the moon cycles exactly and were numbered 1st, 2nd, 3rd as in the Bible. To keep the lunar year (354 days) in step with the solar year (365 days) the kings decreed the addition of an extra intercalary month every three years, so that some years had 13 months instead of 12. The Sumerians numbered years by the reign of kings, and their kings ruled for very long periods of time.

The Sumerians lived in the Fertile Crescent, an area between the Tigris and Euphrates rivers, in present Iraq, Syria & Palestine.

Sumerians used a 12-hour day. Their average hour was equal to two of our modern hours, and the length of a Sumerian hour varied by the seasonal sun. A 6-hour day was from sunrise to sunset, and the 6-hour night from sunset to sunrise. A Sumerian double hour had 60 minutes and each minute had 60 seconds. [Learn More](#)

The Sumerians Knew the Earth and Planets Orbit the Sun.

How did they know this?

The Sumerian calendar identified 12 celestial bodies in the solar system: the sun, moon and 10 planets. 5,000 years before Galileo they knew that the Earth and planets are spherical and that they revolve around the sun. [Learn More](#)

Sumerians left thousands of stone tablets in cuneiform characters, an ancient form of picture writing. What secrets are in the tablets?

This ancient Sumerian tablet shows a solar system of planets revolving around the sun. Galileo proposed this just 400 years ago, and was arrested.

The Sumerian tablets are the only artifacts about the Sumerians to survive the great flood. Scholars have decoded thousands of tablets. Some of their stories echo passages in the **Bible** and **The Book of Enoch** by Noah's great grandfather, **Enoch**. The tablets speak of the ancient gods, kings and giants **Yahweh, Elohim, Enlil and Anu**, who created humans and ruled for centuries. They seven previous civilizations before the great flood. The ***Sumerian King List*** is translation of ancient tablets published in 1939 by the renowned Sumerian scholar and Harvard University professor, Thorkild Jacobson. It lists the names of the kings, their seat of power and the length of their reigns. [King List Translation](#)

The King List includes a long record of ancient civilizations and rulers before the great flood from 275,000 years ago to the present era. It shows pre-flood king life spans averaged 30,150 years! It describes a cataclysmic deluge and shows kings' life spans droppped dramatically after the flood. Their reign lengths gradually decreased to modern life-spans.

This parallels biblical records of very long life spans. The average life-span of biblical patriarchs before the Flood as recorded in Genesis was 858 years.

The Assyrian and Babylonian Calendars Had Advanced Astronomy.

Carving of the god Anu-nnaki, meaning "Those who came from Heaven to Earth."

These beings were said to possess advanced astronomy and wrote the first calendars.

The Babylonian calendar indicates sophisticated knowledge of astronomy including the fact that the Earth orbits the Sun. This is recorded in the tablets "***Enuma Anu Enlil***" written by the gods 'Anu and Enlil', who were said to have come from the stars. The tablets describe precise astronomical movements of the sun, moon, planets, stars, and eclipses. [Learn More](#)

The Babylonian calendar (1700 BCE – 500 BCE) had 12 lunar months. Babylonians used a seven-day week and believed in the sacred cult of the number seven. Every seven days was a holy day dedicated to the Sun. Each holy day was preceded by a day for the powerful god Saturn called ***Saturn-day***. [Learn More](#)

The Assyrian Calendar originated in the area we now call Iraq. It is still in use by Assyrians world-wide. We are now in Assyrian year 6759.

The astrolabe was first developed in the Near East, and was later adopted by England to navigate the seas.

It calculates the angle of the sun, moon, planets and stars on the horizon to find one's position on the Earth, a sort of prototype-GPS. How did they know this?

Ancient cultures observed the Earth's natural cycles and based calendars on the phases of the moon.

Ancient calendars followed the Moon cycles of 29.53059 days.

The Prophet Muhammad declared the calendar should be strictly lunar.

The Modern Islamic Calendar is a Pure Lunar Calendar,
Defined by the Prophet Muhammad.

The Islamic religious calendar is a strict lunar calendar. Since the 12 months follow the moon's phases, a year has only 354 or 355 days, and the holidays regress 10 days each year over a period of 33 years. Muslims begin each month with the first new lunar crescent. The Islamic Month of **Ramadan** is the most venerated when Muslims gather to pray each evening.

The Islamic lunar calendar begins counting years since 622 CE. In his farewell pilgrimage to Mecca in the year 10 AH (632 CE) the prophet Muhammad revealed that an additional intercalary month was prohibited by Allah. **Muhammad said:**

“The number of months with Allah has been 12 months by Allah’s rule since the day He created heavens and Earth....Transposing a prohibited month is against the scriptures. Unbelievers are led to wrong thereby: They make an extra month lawful one year and forbidden the next.”

Are fundamentalist Muslims inviting us to live by Nature’s true cycles instead of our modern system of counting TIME?

The Muslim World Uses Many Concurrent Calendars.

We are Now in Islamic Year 1431, and Persian Year 1389.

The Moon and Star symbol unites the Muslim world. It symbolizes divine light and the perfected human being.

The original Persian calendar was a purely lunar system. Later it became a 360-day year of 12 30-day months. The modern Persian calendar now has 12 months of 30 or 31 days, and a leap year every four years. New Year is at the spring equinox.

Most Islamic countries now use the Christian Gregorian calendar for everyday with two exceptions: Iran uses the Persian calendar above. Afghanistan uses the Persian calendar, except for the period 1999 – 2002 when the Taliban rulers adopted the purely lunar Islamic religious calendar.

Muslims represent 1.6576 billion people or 24% of the world. Many use traditional calendars. Indonesia uses six concurrent calendars: Gregorian, Javanese Pasaran, Wetonan, Balinese Lunar, Balinese Sacred and the Islamic religious lunar calendar. [Learn More](#)

The actual Hebrew calendar is very complex. In order to have festivals fall in certain moon phases or weekdays in a worldwide system, a new calendar was calculated by **Rabbi Moshe Ben Maimon** in 1178 CE. In 'Sanctification of the New Moon', he wrote:

Isaac Newton Discovered that Ancient Hebrew Architecture Encodes Sacred Mathematical Timelines as in the Egyptian Pyramids.

The Temple of Solomon was built in 960 BCE. The ***Ark of the Covenant*** was located in its sacred altar area. Our Week Days are Ruled by the Seven Sumerian Gods.

The Sumerians had seven gods as rulers of the planets. They are **Utu, Nanna, Gugalanna, Enki, Enlil, Inanna** and **Ninurta**. These Sumerian gods are the origin of the seven day week in all world cultures. The exceptions are Egyptian, Chinese and American indigenous calendars, which once had a 10-day week.

UTU, the Sun God, rules on Sunday.

Enki, God of water, wisdom, semen and the planet Mercury, rules on Wednesday.

Inanna, goddess of beauty, fertility and Venus, rules on Friday.

Chapter 5: The Greek Calendars and Unified Field Theory.

Over 2,000 years ago a few astonishing Greek astronomers studied the cycles of Time. They laid the foundation for a ***Unified Field Theory*** based on mathematical harmony in Nature.

Modern quantum scientists now describe a similar underlying intelligent energetic force as the basis for physical matter. See Chapter 11.

Pythagoras Saw a Harmonious Universe Connecting All Things.

"There is no word or action but has its echo in Eternity."

Pythagoras, 570 BC, mathematician and astronomer, called the heavens ***kosmos*** meaning ***ordered world*** because it is in perfect harmony. Pythagoras suggested that the Earth and planets revolve around a central fire, and that celestial bodies move in mathematical equations corresponding to musical tones, producing a symphony or 'harmony of the spheres.' [**Learn More**](#)

The Five Ages of Mankind

Plato's 'Great World Year' of 25,920 Years

The Golden Age was the happiest time. Men lived without illness, war or toil in the abundance of wild foods. When they died they became guardians of mankind.

In the Silver Age the new gods arrived. They began to experiment on the creation of mankind.

The Bronze Age was filled with brazen men who loved war, and finally destroyed themselves in continuous war.

In The Heroic Age a race of demigods was rewarded for their courage on the island of Elysium upon their death.

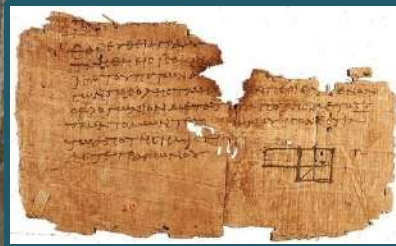

The Iron Age is the worst age where goodwill and decency cease to exist. Men suffer oppression by wicked rulers whose greed finally ends when Zeus destroys them.

The Antikythera Device (An-ti-ki-**THEER**-ə) was recently analyzed using 3-D X-ray imaging. Dated from 80 BC the handmade brass device has three main dials and 32 interlocking gears turned by a handle. The dials incorporate systems from both the Egyptian calendar and the Greek zodiac. The device could predict eclipses and adjust for leap years. Its wheels defined calendar times for planting, harvesting, religious days and even dates for the Olympic games. [Learn More](#)

Chapter 6: The Roman Calendars Define our Concept of Time.

***Julius Caesar, 100 BC - 44 BC
Roman Emperor,
Father of our modern calendar.***

***I am Julius Caesar,
Emperor of Rome***

***I created your calendar
with one powerful intention:
To Conquer the World.***

What is Our Modern Calendar?

The word 'month' means 'moon' but we do not follow the moon cycles.

Julius Caesar made his mark on our calendar.

Our modern calendar came from ancient Rome. It is a lunisolar calendar with 12 months in a year. Our year has 365 days with a leap day every 4 years. We think of TIME as digital and linear. We divide a day into 24 equal hours of 60 minutes each. Every minute has 60 seconds. We number our years from Christ's birth and group them in 100-year units called centuries.

We think of time as digital and linear.

How did our modern calendar develop?

The First Roman Calendar had Only 10 Months.

The original Roman calendar started the New Year on March 21st at the spring equinox. There were just 10 months in a year totaling **304 days** and 61 days in winter that did not belong to any month. The 10 months were Martius, Aprilis, Maius, Junius, Quintilis, Sextilis, September, October, November, and December. These last six months mean 5th, 6th, 7th, 8th, 9th and 10th.

King Numa Pompilius added January and February, to make 12 months in a year.

In 713 BC **King Numa Pompilius** added January and February to create a 12-month year. He did not change the names of the last six months, and their numbers are misleading still to this day.

This Roman calendar stone with 12 months was made after the calendar change in 713 BC.

Roman calendars were modified often by the rulers of the day, sometimes creating confusion. Romans counted years for the Kings in power and later from the founding date of Rome in 753 BC. A week had eight days from the Etruscans, but Romans later adopted the Greco-Persian seven day week.

Our Months are Named for Roman Gods, Emperors and Wrong Numbers.

January is named for the god Janus, the guardian of entry-ways, and the double-faced ruler of the 12 other gods.

What are our months named for?

January – The Roman god Janus, ruler of entry ways.

February – Februum is a Roman purification ritual.

March - The god of War and planet Mars.

April – Aprilis is a spring nymph.

May - The Greek Maia, goddess of fertility

June – Juno was the wife of Jupiter, king of the Gods.

July – This month is named for Julius Caesar.

August - Caesar's son Augustus named this for himself.

September – It was once the 7th, but is now the 9th month.

October - It means 8th, but is now the 10th month.

November – It means 9th, but is now the 11th month.

December – It means 10th, but is now the 12th month.

Early Roman Calendars Were Defined by Gods.

In early Rome gods were called '**Numina**' or divine beings. Everything in Nature was imbued with **Numina**, the sacred force, whose role was to manifest **Divine Will** through **natural phenomena**.

Nature was imbued with Numina, a sacred force of divine beings.

Julius Caesar Invented the Julian Calendar in 45 BC.

Julius Caesar

After many centuries of calendar confusion **Julius Caesar introduced the Julian Calendar in 45 BC**. He was assisted by Cleopatra's astronomers who understood a year has 365.2422 days. They created a 12-month calendar with 365 days and a leap day every four years. This represented a major calendar breakthrough, and the changes were eventually adopted throughout the Roman Empire. Julius Caesar declared himself Emperor for life. [Learn More](#)

Julius Caesar's new Julian calendar was adopted throughout the Roman Empire.

Cleopatra assisted Caesar in planning the Julian calendar. She ruled Egypt as Pharaoh from 51 BC – 30 BC.

Early Christians Were Outcasts in Rome.

Early Christians were persecuted and often called atheists because they believed in an invisible God.

Early Christians were very unpopular in Rome. They were often beaten, crucified or beheaded. For example the apostle St. Paul was beheaded in Rome in 67 CE, and St. Peter was later crucified upside-down on the site of the present-day Vatican.

St. Peter was hoisted up on a cross and crucified upside down.

On December 25th Romans Celebrated the Solstice and the Birth of the Sun God.

The festival '***Sol Invictus***' or '***Unconquered Sun***' marked the birth of the ***Sun God*** on December 25th and to celebrate the return of the Sun on the solstice day.

In the 1st and 2nd centuries CE the Persian-Indian Sun God ***Mithra*** rose in popularity. Romans celebrated ***Mithra's*** birth on December 25th.

Sun God's birthday festival, Sol Invictus, was December 25th.

Was Mithraism the First Monotheistic Religion?

This mysterious, secretive religion was for men only, and became the official state religion of the Roman Empire for nearly two centuries until 313 CE. By learning to read, training the body and mind, practicing martial arts and discipline of the senses, any man could advance through seven levels or dimensions to be a divine being.

Mithraism was popular among Roman soldiers and unified the Roman Empire under a single god, effectively paving the way for a more organized Christianity for everyone. [Learn More](#)

Constantine Created a Compelling New Worldwide Religion.

In 313 CE Emperor Constantine embraced Christianity ending centuries of Christian persecution. He incorporated ritual elements of many other ancient sacred traditions into a persuasive new faith. As the Roman Empire grew weaker, the new Christian church rose in power. They called the new religion **Catholic** from the Greek ***katholikos***, or universal and true to the central Roman church as opposed to other Christian sects.

Emperor Constantine

Emperor Constantine built the first Christian basilica in 326 CE on the present day Vatican site. Constantine's mother Helena became a Christian in 312 CE at the age of 63. Constantine asked her to supervise a journey to Jerusalem to find Christian relics to sanctify the new basilica. Helena went to the holy land and returned with pieces of the crucifixion cross, nails, a holy tunic and rope fragments. On her death she was sanctified as Saint Helena.

The current Vatican City is built over ancient temples to 3 other gods: Cybele, the original Roman Magna Mater or Great Mother Goddess, Apollo, and Mithra, a Sun God.

Christianity was Declared the Official Religion of the Roman Empire.

In 380 CE Emperor Theodosius declared Christianity the sole religion of the Roman Empire. Other faiths were called 'Pagan', or 'rustic country dweller' and their temples closed. Mithraism, Sun worship and all other religions were prohibited on penalty of confiscation of property, torture, slavery, or death. The ancient library of Alexandria, Egypt was destroyed. Temples to the early gods became Catholic churches.

Roman Emperor Theodosius outlawed all non-Christian religions and closed their temples.

As Rome declined in political power, the Roman Catholic rulers rose in power.

In the 4th and 5th centuries Rome was brutally defeated and sacked by warriors from the north. The Empire declined slowly, and the new church rose into power. Roman bishops borrowed the Mithraic high priests' title **Pater Patrum**, which became **Papa**, or **Pope**. From 491 CE, emperors were required to sign a declaration of Catholic faith and allegiance before their coronation. [Learn More](#)

In 525 AD The Monk Dionysius Exiguus proposed a new system of numbering years from Christ's birth. **It was called AD, Anno Domini, Year of our Lord.** We call it **CE** or '**Common Era**'. Bishops defended the new rules, and many changes were adopted. Ancient beliefs in reincarnation were declared heresy, and their New Testament passages were removed. Astrology study in schools was discontinued. New Years Day was changed to March 25th, and that day was recognized as the angel's annunciation date to Mary of her immaculate conception.

The conception was March 25th, and Christ's birth 9 months later on December 25th.

In 525 AD Roman bishops declared the festival of the Immaculate Conception to be March 25th, the equinox, the New Year. And Christ's birth was declared to be exactly nine months later on December 25th, the solstice. Since Roman numerals have no zero, Christ's birth year was decided to be 1 BC. Together these eight ages represent a full cycle of '**The Great Year**' or **Precession of the Equinoxes**, being approximately 24,000 years.

Light emanating from the galactic center affects the human mind as well. Sri Yukteswar explains that just as the cycle of day, night and seasons are caused by celestial movement, so too is the Yuga cycle, or the '**Great Year**'.

When our sun orbits through the galaxy, it is said to bring the Earth closer to or further away from the grand galactic center, called '**Vishṇunābhi**'. This is the center of subtle energy and the creative power or '**Brahma**' which regulates the mental and spiritual level of the internal world. It is the proximity of the Earth and Sun to this grand center that determines the level of human civilization, health, intelligence and spiritual wisdom.

At the end of the last Bronze Age or ***Dwapara Yuga*** c. 700 BC, the reigning king, ***Maharaja Yudhisthira***, was faced with the arrival of the dreaded and dark Kali Yuga. He left his throne to his grandson and retired to the Himalayas with all his wise men. Since no one in the court knew how to count the Yugas, and nobody wanted to announce the bad news, they began adding years to the Bronze Age Dwapara date.

This has degenerated into a series of mistakes and miscalculations that leads many people to believe we are now in the Kali Yuga, or that the Kali Yuga lasts 432,000 years.

The Great Year is Highly Important in Hindu Astronomy

The Hindu '**Great Year**' cycle is believed to be part of a binary star orbit. While modern thinking regards it a phenomenon caused by the Earth's wobbling axis, it was highly important in the ancient calendars. Swami Giri Sri Yukteswar presents a very different model of the Great Year cycle from the modern one of the wobbly axis that we inherited from Isaac Newton. The Hindu Calendar Observes ‘Moon Days’.

Our bodies are mostly water, so we are affected by the moon phases. As the sun and moon exert gravitational pull on the Earth, their relative positions create an expansion and contraction like the breath cycle.

A **Full Moon** occurs when the Sun and Moon are in opposition, and the moon receives the full force of the sunlight. A **New Moon** is when they are in conjunction, and the moon is a tiny sliver in the sky. At the full moon the energetic force is greatest, and we tend to be more headstrong. At the new moon the energy is contracting, making us feel calm and grounded, but dense and not inclined to physical exertion.

Practicing traditional Yoga over time helps us to attune to nature's cycles, so we can live in greater harmony with them. [Learn More](#)

However in periods of novelty, new ideas lead to great transformative events, change, openness and progress.

Terrence McKenna
(1946 –2000)

Curiously, his timeline showed accelerating cycles of time ending in 2012 which he called a ‘Time of ultimate possibility and infinite novelty’. Chinese Astronomers Measured 'The Great Year'.

The first Chinese astronomer to write about the 'Great Year' or Precession was Yu Xi in 300 CE. The Chinese call past ages Kis, and they count ten Kis from the beginning of the world.

The ancient book, Sing-li-tas-tsiuen-chou, describes the cycles of convulsions of Nature. The span of time between two catastrophes is called a 'Great Year'.

The Great Year is the Earth's seasonal cycle in the galaxy.

Chinese Astronomers understood the Great Year.

The Chinese Calendar Follows the Moon and Seasons in the Cycles of *Qi*.

The Chinese five-element system recognizes five seasons: Spring, Summer, Indian Summer, Autumn, and Winter, with special celebrations at the Equinox and Solstice.

The Energy force or ***Qi*** rises and falls with the seasons in a cycle of Yin and Yang. From March to October the ***Yang Qi*** is rising strongly. From mid October through January the ***Qi*** is contracting in a time of Yin.

Moon cycles are observed with reverence in the traditional Chinese calendar. The **Full Moon** is the 15th day of the month, and the **New Moon** is the last day of each month in the traditional Chinese Lunar Calendar. Specific practices are associated with both Full Moon and New Moon days.

Stone Calendars are Linked by Earth Energy Lines.

Alfred Watkins

In 1921 Englishman **Alfred Watkins** had a sudden insight while looking at a map of the countryside. He saw that many prehistoric sites such as stone circles, burial mounds, and ancient hills fell in straight lines. He believed this network could not be mere chance.

Watkins fathered the study of the **Earth Planetary Grid**, also called **Telluric Lines**, or **Geomancy**. The grids can be detected with scientific tools or a dowsing pendulum or rod. [More](#)

Egyptian Pyramids Were Calendars Based on the Stars.

The Pyramids are oriented to point to the solstice sunrise.

Egyptians used 3 written calendars: Their civil calendar year was 360 days long with 12 months of 30 days each, plus 5 extra days (*epagomenes*) at the end of the year. They had a 2nd lunar calendar, and a 3rd calendar for planting times. Each month had 3 weeks of 10-days each.

The Pyramids marked the solar year by indicating the solstice. They were also constructed to form an exact pattern of the constellation Orion.

The Egyptian year began at the rising of the star Sirius on the horizon. Sirius was visible at dawn all year except for 72 days in the winter. When Sirius 'returned' in the spring it was a celebration as it coincided with the annual flooding of the Nile, irrigating fields and heralding the planting season.

Thoth, the Time Keeper. Egyptians knew of the 'Great Year' cycle of 25,920 years, and tracked the 12 Zodiac Ages of 2,160 years each.

Egyptian Pyramids Were Solar Energy Conductors

Modern scientific methods such as carbon-analysis and astronomical dating are illuminating new and surprising facts about the pyramids. Recent findings indicate that the pyramids were built in a Golden Age when humans had higher levels of spirituality, intelligence and technology.

The pyramids were not tombs. They were antennas that used advanced geometry to connect the power of the Earth's magnetic field or energy grid. These structures worked together as solar device to focus energy from the Sun much like a **Tesla Tower**.

Evidence of burns in highly conductive stones such as granite and dolomite indicate high internal temperatures. They radiated an energy field to invigorate the body, uplift humanity and consciousness.

New research indicates the pyramids were solar generators to broadcast an electromagnetic field to uplift citizens and the environment.

Recent Discoveries Suggest New Chronology in Egypt.

Modern scientific dating methods combined with historical linguistics indicate the Sphinx and Pyramids may be 12,000 to 35,000 years old. Analysis of water and weather marks show that they have endured catastrophic floods and climate changes for thousands of years.

Inside the great pyramid are huge stones cut to precision. Egyptologist Carmen Boulter has gathered evidence which suggests that advanced knowledge of quantum physics and levitation were used to construct the pyramids. The Great Pyramid is made of 2.3 million huge stones precisely cut and seamlessly fit together, and simply could not have been built by hand. [Learn More](#)

A Egyptian Golden Age Lasted 10,000 years.

An advanced Egyptian civilization endured for over 10,000 years. It was a civilization that valued consciousness over material wealth. They had deep respect for the feminine and the balance of masculine and feminine. Schools of initiates were trained to serve the highest good of mankind, healing with sound and light, connected to the larger cosmos. They were fully empowered humans using the full capacity of their brains and senses.

Egyptians had no word for **‘Death’**. It was simply called **‘Westing’**. The Sun sets in the west to rise again in the East.

Ancient Egyptians were keenly aware of higher dimensional knowledge, and viewed death as a mere passageway to the true life. Hieroglyphic writings and stone images encode complex symbolism regarding birth and death. These are clues to Egyptian knowledge about expanded states of being and higher levels of awareness.

Ka Statue of Pharaoh Hor Awibra is an example of rich symbolism regarding death: Two arms overhead represent the Ka life force that is separated from a human at birth, and unifies again upon death. Bodies were mummified to contain and support the Ka, to assist in the release and ascension of the soul.

The Pyramid Code – A Documentary Sees Egypt with New Eyes.

The Pyramid Code is an astonishing film that explores the pyramids, Egyptian temples and ancient megalithic sites around the world. It searches for clues to knowledge and advanced technology in an ancient Golden Age.

The series is based on the extensive research done in 23 trips to Egypt and 50 other countries around the world by Dr. Carmen Boulter in the Graduate Division of Educational Research at the University of Calgary. It features prominent scholars and authors in multi-disciplinary fields.

The series explores penetrating questions:

Who were the ancients and what did they know?

Could the pyramids be much older than traditionally believed?

Are there still secrets hidden in plain sight?

Are we really the most advanced civilization to ever live on Earth?

Who Were the Kings and Queens of Egypt's Golden Age?

The purest form of Egyptian culture is said to have been during the reign of Pharaoh Akhenaton c. 1350 BC. Akhenaton ruled a spiritual dynasty according to divine laws, worshipping one god, Aten, symbolized by a sun disc. After the death of Akhenaton's son King Tut in 1323 BC the hierarchical Amun priests regained power, and a global dark age began. The ancient wisdom schools were ridiculed, went underground, and finally disappeared. When the Greeks and Romans arrived, the ancient knowledge had long been forgotten.

The Pyramid Contains the Earth's Dimensions and a Timeline.

According to **'The Great Pyramid Decoded'** by Peter Lemesurier, the Pyramid at Giza contains exact measurements of the Earth's dimensions and a timeline of human history.

**The Great Pyramid

Peter Lemesurier.**

Inside the Pyramid are a series of precisely shaped inner passages. The basic unit of measurement is the Egyptian cubit. The length of the pyramid base is exactly 365.242 units, precisely the number of days in a year. There are many other meticulous measurements within the design, indicating that the pyramid designers knew details about the Earth's size and orbit, to an accuracy only recently achieved with satellite data. Is the Key to 2012 Coded in the Egyptian Pyramids?

A timeline is revealed through ancient numerology, using one Egyptian inch for one year. The timeline indicates all major world events in history year by year. It marks the birth and death of Christ, American and French revolutions, the rise of industrialism and World Wars I and II, etc. Around the 2000 AD millennium, it shows the beginnings of a new enlightened spiritual society. Between 2004 and 2025 it shows a total collapse of civilization, followed by a slow recovery and a golden age from 2500 into the future.

Tunnels in the King's chamber in the Pyramid of Giza reveal details of our current period.

Isaac Newton Found the Pyramids Encode Earth's Geometry.

Isaac Newton, 1642 – 1727
Mathematician, Physicist,
Alchemist

*What we know is a drop.
What we don't know
is an ocean."*

Sir Isaac Newton noticed that the ancient Egyptian **Sacred Cubit** measuring stick was exactly $1/10,000,000$ of the Earth's circumference. How did the Egyptians know this? Studies of the Pyramid dimensions reveal hundreds of synchronicities that encode all the Earth's geometry. Newton concluded that the pyramids were built by masters who understood geometry of the Earth. [Learn More](#)

Newton wrote about the Hebrew unit of measurement called the **Sacred Cubit** used in the **Temple of Solomon** and the **Great Pyramid of Giza**. In order to calculate his law of gravity, Newton needed the exact circumference of the Earth. His inquiries revealed the Pyramid contains ALL the proportions of the Earth, and of TIME.

Newton Integrated Modern Beliefs with Egyptian Wisdom.

Isaac Newton
1642 – 1727

***Hermes Trismegistus,
Ancient Egyptian Master***

Newton believed that an invisible energy or ***ether*** acts over vast distances. He was criticized for introducing this 'occult idea' into science. In 1687 he published ***Principia*** showing how the invisible force of gravity explains the motions of all heavenly bodies. He also wrote that the ***Great Year 25,920 year Cycle of Time*** is caused by a wobble in the Earth's axis.

Newton studied the writings of the Egyptian master Hermes Trismegistus. Under the influence of the Hermetic tradition, his concept of Nature underwent a decisive change. He concluded that the Hermetic teachings originated in very ancient times, and were given to humanity by great beings.

***Newton spent his later years in isolation studying
ancient alchemy, metaphysics and the Bible.
But he remained utterly and completely silent about his findings.***

What's the Origin of the Word 'Pyramid'?

The *Coptic* people are the modern descendants of the ancient Egyptians. Some say the word **Pyramid** means '**a division of ten**', coming from the Coptic word **pyr** or **division**, and **met**, a hieroglyph denoting the number **ten**.

Others say it comes from the Coptic **Per** or **Pi** meaning **house**, and **Meh** meaning measure. So **PI-RA-MEH** would mean '**Measure of the House of RA**'.

The Greek word **Pyramidos** is said to be composed of the words "**pyra**" meaning **fire, light or visible**, and the word "**midos**" meaning **measure**.

Who was the Egyptian Master Hermes Trismegistus?

*"As above,

The Greeks called Hermes the ***Messenger of the Gods***. Romans called Hermes the God ***Mercury***. To the Arabs he was ***Idris***. In ancient Egypt ***Hermes*** was known as ***Thoth*** or ***Imhotep***, Master of all Arts, Sciences, ***Embodiment of the Universal Mind*** and son of Seth. Hermes is said to have taught that the Sun was the center of the Solar system. He described the Earth's '***Great Year***' many centuries before it was re-discovered by the Greek astronomer ***Hipparchus***.
How did he know this?

Hermes was called a god in many ancient traditions.

According to Edgar Cayce, ***Hermes*** arrived In Egypt with survivors of Atlantis in a time called ***Zep Tepi***, or Genesis, thousands of years ago. Hermes is said to have created a mother language that encoded natural waveform geometries. Called ***Hiburu***, or early ***Hebrew***, it was a harmonic language based on patterns and vortexes of light. [Learn More](#)

The First 365-Day Calendar is Credited to Hermes.

Hermes Trismegistus calculated the movements of Heaven and Earth.

Hermes Trismegistus was said to have invented the first 365 day calendar. He did this by adding five days after the winter solstice. These days are associated with the birth of the Gods. Ancient mythology says that many years ago our Earth year had exactly 360 days, but changed in a calamity. All Earth calendars were realigned.

*Hermes was called **Thoth**, or **Ibis**, and was depicted with the symbolic head of the sacred Ibis. This represents the **Akhu**, soul of an Ascended Master incarnated on this plane by choice. **Thoth** was called the 'One who Made Calculations of the Heavens, Stars and Earth', the 'Reckoner of Time and Seasons' and the Keeper of all Knowledge. Dogon master Naba Lamoussa Morodeninbig says the ***Dendera calendar*** precedes all modern history and is over 54,000 years old. The ***Dendera Calendar*** shows the Egyptians understood '***The Great Year***'. It is the original model for astrology and the source of all our zodiac houses and signs. It is the basis of the ancient Greek zodiac myths, and home of the Hermetic Tradition, demonstrating the axiom, "***As above, so below.***" The ***Dendera Calendar*** may be the original source of our modern calendars and time-keeping system.

Egyptian and Mayan Calendars Show Similarities.

Both Mayan and Egyptian calendars use a 365 day calendar with 360-days, plus five extra days at the end of the year. Is this a coincidence, or is there a connection between the two calendars?

In Egypt the most important seasonal festival was in July, marking the annual rising of the star Sirius at sunrise. This took place during the 5 days outside of normal time and space at the end of the 360 day year. Egyptians inserted five days at the end of the year to harmonize the 355 day 13 moon lunar calendar and 365 day solar year. These five days were considered outside the year and beyond normal time and space, when the curse of the sun-god was removed, and the god Osiris was born.

Where is the Original Mayan Calendar?

The Dresden Codex is a sacred work of art on Mayan astronomy and the calendar.

The Dresden codex illustrates calendar details in pictures words and numbers. It contains astronomical data, stellar mechanics, tables of integers for calculating time, planetary movements, Mayan gods and ritual scenes.

A Mayan Calendar Original

An 11th or 12th century manuscript from Chichén Itzá was found in Dresden, Germany centuries after the Spanish conquest. It is now called **The Dresden Codex**. It is inscribed on 39 double sheets that were copied from an older text on from fig tree bark paper. It describes the 20 Mayan calendars in Yucateca language, using the Mayan dating system in base-20 mathematics. **[Learn More](#)**

The original Dresden Codex was inscribed on 39 pages of fig tree bark. It has been since re-printed.

The Mayan Calendar is a System of 20 Interrelated Calendars.

The Mayan Calendar is actually 20 unique concurrent calendars that track time back billions of years. The living Maya are allowed to speak of 15 of the calendars. Five of their Calendars they cannot speak of at this time. These are the cycles of our ancestry before we came to Earth. [Learn More](#)

Mayan shamans journeyed to cosmic regions to study the nature of TIME.

Mayans tracked natural cycles of the planets, stars, galaxy, animals, plants, and humans. These time cycles are all living calendars that are used simultaneously and are interrelated.

Mayans even tracked the Monarch butterfly cycle.

*Mayans studied Nature's rhythms.
Each calendar represents a different cycle: Insects, corn, human biorhythms, moon cycles, gestation, etc.*

Mayans were expert timekeepers & visionaries. Mayan priests were versed in astronomy and time cycles. To prepare the calendars, Elder Shamans journeyed into the cosmic regions. There is much we do not know. [Learn More](#)

The Mayan Calendar is a Galactic View of Time, Going Back 16.4 Billion Years.

The Mayan calendar measures **nine Ages**, called **Underworlds**. Each age is represented as a layer in a pyramid. The Ages are tracked back 16.4 billion years.

Each age has a corresponding evolutionary consciousness, such as cellular, mammalian, familial, tribal, regional, national, planetary, galactic and universal.

The nine Mayan Ages are called 'Underworlds'.

Mayans track TIME in cycles. Each age or **underworld** is built on the foundation of, and is a review of the previous age, like a pyramid spiraling upward. As we pass through a new age, we re-experience the qualities of the previous age in accelerated time with an added layer of consciousness. Thus the cycles of life and TIME continue to open and accelerate exponentially. **The universe is continually expanding, more refined, quickened and complex.**

Mayan Calendars are represented as many concurrent spirals of time.

Three Main Mayan Calendars: the Tzolk'in, Haab' and Long Count.

1. The **Tzolk'in** means 'count of days'. It has 20 weeks of 13 days each, totaling 260 days. It tracks human biorhythms and gestation. It has a harmonious relationship to the planets and God. This cycle is the most important and is considered a sacred or divine cycle.

The Tzolk'in calendar has 20 weeks of 13 days each, like interlocking gears.

2. The **Haab'** yearly calendar has 365 days.

Like the Egyptian calendar, there are 360 days in a year plus 5-days at the end of the year. But this calendar uses 18 Months of 20 days each, totaling 360 days. It is used as a civil calendar.

Like a wheel within a wheel, the Tzolk'in cycles around the Haab calendar. Thus each day has multiple coordinates and is totally unique in TIME.

3. The **Long Count** Calendar has 5126 years.

The Long Count calendar is a continuous record of days that restarts every 5126 years. The current Long Count began in 3114 BC and it will end in 2012.

The Haab' yearly calendar of 365 days

The Tzolk'in and the Haab' calendars move together

How to Read Mayan Calendar Dates.

To express a date, the Mayan calendar combines the three different calendars together.

1. The **Long Count**, 2. the **Tzolkin** (divine calendar), and 3. the **Haab** (civil calendar). Of these, only the Haab has a direct relationship to the length of the year.

A typical Mayan date looks like this:

12.18.16.2.6, 3 Cimi 4 Zotz.

12.18.16.2.6 is the **Long Count** date.

3 Cimi is the **Tzolkin** date.

4 Zotz is the **Haab** date.

The 20 Mayan calendars are independent and rarely end together.

Synchronistic ending dates are therefore considered a very significant time.

Five Mayan Long Count Cycles Make a **Great Year.**

Mayan Cosmology Shares Common Threads with Tibetan, Hopi, Incan, Greeks, Romans, Chinese and Modern Quantum Physics

The '**Hunab Ku**', or **galactic center**, is regarded as the ultimate creator, a principle of higher intelligence. Mayans see everything in our galaxy as directed from this center of intelligence, by the electro-magnetic radiation of Light. This echoes writings of Greek mathematicians ***Pythagoras*** and ***Euclid***, and modern unified field theory of quantum physics. [Learn More](#)

*The '**Hunab Ku**' galactic center represents the four directions and the great Spirit or Oneness.*

*Radiant energy emanates from the galactic center, or '**Hunab Ku**'.*

Mayan cosmology shows the universe as the heavens, the Earth and an Underworld. Celestial bodies such as stars and planets were believed to be living beings like gods that influence man and could be affected by them, much like early Roman gods and ***Numina***.

The Mayan cosmos shows the four directions of the Earth and a fifth in the center, like Tibetan, Incan, Hopi, and Shamanic traditions worldwide.

Mayans Say We are Now in a Period of Accelerating Time, called the “Triumph of Materialism”.

The Maya said this would be a time of forgetting, when we drift far from Nature & live in a collective amnesia. Like a lapse of memory, we believe appearances are real, and do not notice the spiritual essence which sustains the world. Thus we are trapped by our senses in a world of ego & domination. There is Great Confusion About the Mayan Calendar.

Neither Mayan Elders nor scholars agree on the exact dates or prophecy, due to great confusion and misinformation about the Mayan Calendar. This is understandable. Albert Einstein

*"The only reason for TIME

Quantum Physics Says an Intelligent Force is the Basis for Matter. *And does not assume ANY Physical Laws of Time or Space.*

“As a man who has devoted his whole life to the most clear headed science, to the study of matter, I can tell you as a result of my research about atoms this much: There is no matter as such.

All matter originates and exists only by virtue of a force which brings the particle of an atom to vibration and holds this most minute solar system of the atom together.

We must assume behind this force the existence of a conscious and intelligent mind. This mind is the matrix of all matter.”

“We have no right to assume that any physical laws exist, or if they have existed up to now, that they will continue to exist in a similar manner in the future.”

Quantum Physics Shows the Whole is Greater than the Sum of its Parts.

There is a gap between traditional Cartesian Physics and the new Unified Field Theory of Quantum Physics.

Traditional physics sees the universe as many discreet parts functioning in predictable patterns that can be understood piece by piece. But quantum physics' **Unified Field Theory** has changed all that by looking at the whole as an interconnected energy field.

An orchestra is greater than the simple sum of its parts.

We used to believe movement is continuous, ruled by linear laws of TIME. Things couldn't just disappear and reappear somewhere else at the exact same instant. But quantum physics shows us an electron can appear in many locations simultaneously, and the entire universe is inter-connected in an energy field that is conscious and alive.

Newtonian physics says that objects can be found by location and speed, ruled by gravity, moving in predictable patterns. But quantum physics says the opposite. We can know where an electron is only by **probability**, and that other factors are involved, such as conscious thought. It is our observation that collapses this nebulous existence into something more tangible? Does this mean our thoughts influence or create material reality?

Unified Field Theory Says We're Part of a Conscious, Interconnected Energy Field.

Nassim Hamein

A new solution to Einstein's field equations has been found, which incorporates torque and Coriolis effects. ***Nassim Hamein***, Director of Research at the ***Resonance Project***, says that instead of seeing ourselves as separate from everything around us, we can view ourselves embedded in a living feedback system that connects all things in infinite potential.

This leads to theoretical and technological advancements that move us towards a sustainable future, and has the potential to solve the most pressing issues of our TIMES. Is the Whole Solar System Feeling Global Warming?

NASA Reports:

Dr. Edgar Mitchell
Former NASA astronaut
and moonwalker

ALL planets show evidence of global warming:

Mercury – NASA 2008: “Magnetic field during Messenger flyby is different from previous observations.”

Venus - Surface temperature rises to nearly 900° F.

Mars - NASA reports clouds, and rapid reduction of ice.

Saturn - Plasma torus (rings) appear 1000 times denser
1981 – 1993 (Dr. Ed Sittler)

Jupiter - White ovals almost disappeared 1997 – 2000. Dr. Phillip Marcus expects 18° global warming in a 10 year period.

Uranus - Huge storms and big changes per Dr. Eric Karkoschka.

Neptune - Global warming, and 40% brighter 1996 – 2002.

Pluto - Global warming and 300% increase in atmospheric pressure 1989 - 2002

Global Warming has Three Main Causes:

Distance from the Sun, axis tilt, and the 'Great Year' 26,000 year cycle.

The **Milankovitch cycles** explain that climate change has three causes: The Great Year cycle of 26,000 years; Changes in the Earth's orbit, as it is elliptical not circular, and the angle of the Earth's axis. The combined effects create a 41,000 year cycle of climate change. Named for Milutin Milanković, Serbian engineer and mathematician.

"Earth's climate phases are influenced by the Sun's radiation and the Milankovitch cycles. The Milankovitch theory says that that ice ages and global warming are a direct result of Earth's changing distance from the Sun, as the Earth's orbit around is not circular, but is elliptical in shape. The Milankovitch theory has been supported by extractions of sediment layers that vary in carbonate material, indicating cycles of warming or cooling trends."

NASA Reports: Earth is receiving increased radiation from cosmic sources, in a long term trend that started in the 1990s. Galactic cosmic rays (GCRs), high-energy particles or plasma waves, flow into our solar system from deep in the Milky Way Galaxy. NASA regularly reports the Earth's magnetic field is weakening, and Earth is receiving more radiation.

A giant Supernova shoots a huge bubble of plasma into deep space.

NASA: “Earth’s magnetic field in a constant state of change”.

Earth's core, hot ocean of liquid iron in the center.

Sitting atop the hot inner core, a liquid outer core seethes and roils like water in a pan on a hot stove. The outer core has whirlpools powered by Earth's rotation. These complex motions generate our planet's magnetism. NASA Scientists Glatzmaier and Roberts have created a supercomputer model of Earth's interior to simulate Earth changes.

They see Earth’s magnetic field wax and wane, poles drift and, occasionally, flip. Change is normal, they say, as the source of the field, the outer core, is itself seething, swirling, turbulent. "It's chaotic down there," says Glatzmaier. The changes we see on our planet's surface are a sign of that inner chaos. [Learn More!](#)

NASA is Tracking Magnetic Pole Shifts.

Earth’s magnetic pole used to move 10 km per year, now accelerating to 40 km per year, per Larry Newitt of the Geological Survey of Canada. Sometimes the field completely flips. The north and the south poles swap places. Such reversals are unpredictable, occurring at irregular intervals averaging about 300,000 years. The last one was 780,000 years ago. Are we overdue for another? No one knows.

Dr. Alexey Dmitriev Sees Earth Changes Due to Cosmic Energies.

“Current Earth changes are caused by highly charged energy from deep interstellar space, and are irreversible”.

Dr. Alexey Dmitriev, Russian Academy of Sciences.

Dr. Dmitriev says: *“Effects here on Earth are found in the acceleration of the magnetic pole shift, in the vertical and horizontal ozone distribution, and in increased frequency and magnitude of catastrophic climatic events. There is growing probability that we are moving into a rapid temperature instability period similar to the one that took place 10,000 years ago.”*

The Galactic Center Radiates Magnetic Energy.

“The climatic and biosphere processes here on Earth... are directly impacted by, and linked to the general overall transformational processes taking place in our Solar System. We must begin to organize our attention ... to understand that climatic changes on Earth are only one link in a chain of events taking place in our Heliosphere”. [Learn More](#)

Polar Shift or Reversal?

A Polar Reversal could mean a physical flip, or more likely a change in the magnetic poles, determined from the Earth's molten core. Image credit: NASA

Dr. Alexei Dmitriev of the Russian Academy of Sciences believes the movement in the magnetic poles and increasing anomalies indicate something very dramatic is going on in the core of our planet.

Dr. Dmitriev says that planetary changes are complex, with many contributing factors. The sum of all these influences determines what happens.

The scale of the current changes indicates something is happening far beyond the magnitude of the Gothenburg flip c. 14,200 years ago.

Dmitriev believes the signs suggest a complete magnetic pole reversal is already underway. He estimates the speed of this process will increase in the near future, and that we should prepare for the consequences in a globally coordinated way. The appropriate response should be to draw up a "global, ecology-oriented, climate map which might reveal (the location of) these global catastrophes." [Learn More](#)

Earth Moves Through a Photon Belt Every 11,000 Years?

Photon Belt

The Photon Belt is said to be a band of powerful electro-magnetic light from the galaxy center.

Our Sun moves through this light band every 11,000 years for 2,000 years. The Earth is moving into the belt, and will be there 2012 - 4320 AD.

The 'Photon Belt' is also called the '*Rings of Alcyone*', first reported in 1961 by Paul Otto Hesse. Intense energy fields on Earth are said to alter and raise the vibration rate of every atom in every living being. The Earth was last in the Photon Belt from 10,800 - 8640 BC.

The Photon belt is said to bring challenging energies to Earth for positive change. It brings negativity and fear to the surface and invites opportunity for advancements in consciousness. [Learn More](#)

NASA: “The Sun’s Next Solar Storm Maximum is 2012.”

A Coronal Mass Ejection (CME) is an explosion on the Sun’s surface. It has roughly the power of ONE BILLION hydrogen bombs, and can trigger disturbances in Earth's magnetosphere, called space weather. CME’s occur most often near the peak of an 11-year solar cycle. The next solar maximum cycle is in 2012.

Magnetic Field. Solar wind shielding the Earth is decreasing, and NASA scientists speculate that it could vanish. [More](#)

In 1859 a Coronal Mass Ejection hit Earth's magnetic field. From the Rocky Mountains to New York to Cuba, people witnessed a spectacular light show, and telegraph services were knocked out.

The flare arrived to Earth in just 17 hours. National Academy of Sciences says: ‘A similar space weather event in the US now could induce ground currents that would knock out 300 key transformers within 90 seconds, cutting off the power for 130 million people, and could take 4-10 years to recover.

“The sun is waking up from a deep slumber, and in the next few years we expect to see much higher levels of solar activity. At the same time, our technological society has developed an unprecedented sensitivity to solar storms.”

June 2010, Richard Fisher, NASA Heliophysics Division.

How to Prepare for A Coronal Mass Ejection:

1. Risks: CME's are unexpected explosions in the Sun's corona that spew hot plasma into solar wind. Intense radiation from the Sun arrives within 8 minutes which could fry satellite electronics and all communications. A CME usually arrives to the Earth 1-4 days later, risking Aurora displays and electrical blackouts. ACE scientists can give only a one-hour warning of a CME arrival.

2. Implications: A direct hit of a CME could knock out the power grid over a large area of the Earth, and could take years to repair. Without electricity there is no water, sewage, heat, cooking, refrigeration, telephones, cell phones, transportation, clocks, email, delivery, computers or communications of any kind. Within a few days, people could suffer from exposure, dehydration, lack of food and medication. A worst-case scenario would represent a major lifestyle change.

3. Preparations: We need to shield all satellites and data centers, forecast the event, alert the world energy grid, and have extra parts on hand. If NASA can miraculously shield the satellite energy grid in 8 minutes we will be fine.

Obviously, personal preparation is suggested. A well or water catchment system, non-perishable food such as dry, canned foods and sprouting grains. Cash or medium of exchange, seeds for planting food, garden tools, warm clothes, blankets, a solid group with sustainable skills, a wind-up radio, a power supply and way to cook. A bicycle, good books and a loving partner.

[Learn More](#) [How to Prepare](#)

A Possible Scenario?

A coronal mass ejection from the Sun could reach Earth, affecting the magnetic field, shifting ocean and air currents in the Ring of Fire, creating extreme global weather patterns. The result could bring permanent changes in the Earth's magnetism, in the behavioral patterns and in the DNA of all life forms.

Scientists Search the Heavens for Sentient Life.

It took humans thousands of years to explore our own planet and centuries to comprehend planets in our own solar system. Now “Exoplanets”, or worlds orbiting stars other than our own sun, are discovered every day. Once hidden from knowledge, exoplanets are now being discovered in droves, stunning astronomers with their unique features and sheer numbers. The discoveries are so common that more and more don't even get reported outside scientific circles. [Learn More](#)

Arcturus, a Fifth Dimensional Civilization

is said to be a Prototype for Earth's Future.

Edgar Cayce wrote that Arcturus is one of the most advanced civilizations in this galaxy. Arcturus is a star in the Bootes constellation, 36 light years from Earth. A fifth dimensional civilization, it is said to be a prototype of Earth's future. Arcturians are emotional and spiritual healers for humans.

Arcturus is said to be an energy gateway through which humans pass between death and rebirth. It supposedly functions as a way station for non-physical awareness to become accustomed to physicality. '*The Keys of Enoch*' describes it as the mid-way center used by the galaxy's brotherhoods to govern colonies in this part of the galaxy.

How Did it Happen that Ancient Wisdom was Lost?

We often presume modern Western society to be the pinnacle of human evolution, unaware that some ancient cultures were more advanced in many ways. What happened?

The **Great Year Cycle of 25,800 years** is said to be the basis of the rise and fall of civilization on Earth. **Golden Ages** are defined as times when people are *open minded and not controlled by fear*. **Dark Ages** are times when people *live in fear*, and find security and comfort in the dark.

Could this cycle be as natural as the seasons?

The Wheel of Time is an infinite cycle of expansion and contraction, affecting our bodies, minds and the level of civilization.

Wars have Destroyed Much Ancient Wisdom.

War destroys culture. As empires conquered to expand, they shared their ways with the vanquished, destroyed the old ways, and knowledge of previous generations was lost. For example, indigenous wisdom was wiped out by Western culture and remains virtually unknown.

Ruling Groups Burned Books to Conceal the Truth and Re-wrote History.

Much ancient wisdom of Egypt, Greece and India was destroyed by Roman and Muslim invaders. The murder of so-called Pagan scholars and several burnings of the Alexandria library by Romans in the 1st - 3rd centuries CE destroyed 40,000 of the oldest and rarest books of ancient history and knowledge. It was as if our entire civilization experienced self-inflicted amnesia at that point. History was re-formed to suit the new rulers.

In 11th century India, Muslim invaders dismantled the public education system and burned all books on history and religion. Much knowledge was hidden in Sri Lanka, Burma, Tibet and China. In both East and West, some higher knowledge was retained for elite use.

The Church Controlled ALL Knowledge and Teachings.

Burning heretics and destroying any ideas not in line with doctrine, allowed the Church to destroy ancient wisdom and isolate true Science.

For nearly two millennia, the church was the exclusive keeper of all knowledge and schools, and carefully guarded this exclusive control. By denouncing and destroying threatening ideas, the church created a separation between religion and knowledge. Between the sacred and the profane. Between ancient wisdom and scientific inquiry. Much has been lost.

The Roman Catholic church condemned traditional beliefs as *Pagan*, and destroyed every idea, book or person not sanctioned by papal doctrine. Roman Catholic leaders edited the Bible in the 6th century to delete passages about reincarnation. Astrology study was declared occult and separated from Astronomy. In 1659 the Roman Catholic Inquisition banned dowsing with a pendulum as a 'Satanic activity'.

The brutal suppression of Shamanism and higher states of awareness by the Roman Catholic church has stifled traditional wisdom worldwide. This delayed the re-discovery of science, ancient knowledge and human evolution.

Monotheism: An Easy Tool to Divide, Conquer and Control

Monotheism has been a powerful force in shaping the human condition for the past 5,000 years. A single deity such as **Yahweh** of the Old Testament, the Christian **God** or **Allah** of Islam, has a covenant which sets the tone: God is jealous and requires total obedience and exclusive worship. He will punish heretics and reward the faithful.

The angry God. Monotheism promotes separateness and competition in a worldwide pattern of control.

Judaism, Christianity and Islam are Monotheistic Religions.

A claim to exclusive truth is an excellent tool for organizing the masses in a system of authority that is beyond question or responsibility. This is a sort of battle for souls where the manipulated may consent to adopt the ways of the masters. Can the imposition of monotheism be seen as part of a worldwide pattern of creating competition and strife for overall control? [Learn More](#)

A Flat Earth

A 12th century German map shows the known world as Europe and the Mediterranean area.

We Accept Un-truths or Partial-Truths as Facts without Questioning.

We're very gullible. When lots of people believe something, we often assume it is true without questioning it.

For centuries Europeans believed that the Earth was flat, even though all ancient Eastern cultures from Egypt and China to the Americas knew it to be a sphere that revolves around the Sun.

Some people say that men are left-brained and women are poor drivers. Carrots are good for your eyes. The sky is blue. We could go on and on.

What other assumptions do we make that we never thought to question?

We are Easily Manipulated When We Fear the Unknown.

*Fear of the unknown
keeps us in the dark.*

*For centuries people believed
electricity was a Satanic force.*

People cling to rigid and limited beliefs out of fear. We sometimes share beliefs for centuries, afraid to even ask if they are true.

For example, **electricity** was long feared and considered a satanic magical force because it could not be seen with the naked eye.

We still don't understand electricity, yet our modern lives now depend on it.

If we ask ourselves what we fear, and look beyond this irrational barrier, we are sure to uncover some wonderful truths!

When Information is Disinformation, Then History is a Mystery...

Information

From Latin ***informare***, “to shape into form, to train, instruct or educate”. From ***In*** “into” + ***forma*** “form.” A communication or reception of knowledge or intelligence, generally accepted as true.

Disinformation

From Latin ***Dis*** – negative, mis-formed or mis-educated. False or misleading information is deliberately inserted into common knowledge by announcement or covertly leaked to the public, competitors or rival groups, inviting them to jump to conclusions instead of examining the details and motivation. Dis-information is difficult to recognize as it usually incorporates partial truths and common assumptions.

Fools and tricksters in every age spread lies to hide the Truth for profit.

History

From Greek ***Historia***, “knowledge acquired by inquiry or in a narrative”. A story or tale.

Mystery

From Greek ***Mysteria***, a secret initiation rite or “one who has been initiated”. A puzzling, unknown or strange event that is difficult to fully understand or explain. A secret.

Is 2012 to be a Hyper-Dimensional Shift on Earth?

Anthony Kane, a black American relative of Dr. Martin Luther King Jr. and reported contactee of an apparent extraterrestrial, hyper-dimensional governance called the “Council of Twelve,” has predicted developments concerning a dimensional shift which Earth and human consciousness is now undergoing in relation to 2012. [Learn More](#)

The “Council of Twelve” said humans with a consciousness anchored in fear will remain in the 3-D Earth. Those who are experiencing a “conscious awakening” and putting an effort into being conscious of the shift will migrate into the new fifth dimensional Earth.

The “Council of Twelve” stated that between the dates December 12, 2012 and December 21, 2012, the planet Earth will split dimensionally into two separate Earths, each of which has different dimensional frequencies, in a process analogous to the way a single cell can split into two cells.

ET's to Create a Parallel Earth in 2012?

Dolores Cannon, Navy wife and hypnotherapist, noticed a common thread running through a number of her clients. Many revealed that they had lived on another planet in a previous lifetime, and felt compelled to answer a distress call to save Earth and the human race.

Mrs. Cannon discovered that there is an advanced race of extra-terrestrials called "the Custodians" who were responsible for creating the planet Earth and all life found on it billions of years ago.

Upon further investigation, she discovered that the Custodians have a brilliant plan to rescue Earth and its people from an apocalyptic demise. The plan calls for a splitting of the planet into two Earths, one that will remain in the lower 3D consciousness of fear and negativity, while a whole "new Earth" will be created of a 5D consciousness that will resonate with positivity and awakening. There will be two Earths.

Each Earth will be completely unaware of the other as the separation begins to happen, and it may be so subtle that those people on either of the two Earths will not even notice a change has occurred, at least initially.

Part IV. What Does it All Mean?

Chapter 16: Mystics and Channels Speak about our TIMES.

Mystics and channels are those people who sometimes see through the veils of illusion.

When searching for the Truth, it is important to listen to ALL sides with an open mind.

While psychic sources are often confusing and unreliable, sometimes they contain Truth with a Capital 'T'. In these cases, it may be due to our limited perspective that they seem a bit strange.

When ALL the mystics agree, and when it resounds true in our bones, it is well worth hearing.

But understand the nature of paradox: For those who follow my words and open their hearts and their minds--for those who have "ears to hear"--there is no problem whatsoever. What is false must die so what is true can be born.

You are, right now, living at the time of revelation, Apocalypse, and the fulfillment of prophecy. Let there be no doubt. You stand at the edge of the Abyss. The word "Apocalypse" means "uncovering"--and in these last clock ticks of this world age, all must be revealed, uncovered, so that all can be known. You have just a few years yet remaining to prepare the vehicle for your higher self. Use them precious.

What does the ‘Law of One’ Say about 2012?

Summarized by Metaphysical Scientist, David Wilcock.

The Law of One series makes it very clear that the following will occur 2011-2013:

- *All earth changes ("inconveniences") will cease after 2012;*
- *The photon (which is the builder of all life, matter and energy) will shift to a whole new vibrational frequency (the green-ray) in 2012 - hence life, matter and energy will profoundly change as well; * the earth will be a ‘fourth-density positive planet’ after 2012.*
- *Fourth-density life is "electrically incompatible" with third-density life;*
- *Fourth-density entities are segregated from third-density entities because they cannot cloak themselves otherwise for their own protection;*
- *Negative entities (like the negative elite) are segregated from fourth-density positive planets, enforced by strict quarantine protocols - hence no more Enron scandals, wars, etc.*
- *The earth will make an approximately 22-degree realignment on its axis when it shifts to fourth-density; and*
- *An event we now call "Ascension" and Ra called "Harvest" will occur at this time.*

“There is an amazing amount of intelligence from the secret projects that shows they are VERY aware of what is going on with 2012. They don't understand it, they don't know exactly what it will do, but they are keenly aware that something very big is going to happen. There is a very powerful event that happens in 2012 that they all know about, and any time after that date is subject to the perceptions of the observer. Up until then it's all relatively fixed.

How to Transform Darkness into Light.

from "The Light Shall Set You Free" p. 216 by Milanovich.

The Law of Perpetual Transmutation of Energy.

"...All persons have the power within them to change all conditions in their lives, just by understanding how to use one Universal Law. Since higher vibrations consume and transform lower ones, each person can become an alchemist of the heart, if he or she chooses.

Forgive the Darkness in Yourself and Others to Dissolve it Forever!

This Law works with the WILL. It works only when one CHOOSES to transform the darkness into Light and when one has a desire to change surrounding conditions into a higher form of existence.

This law is also a one-directional law; therefore, it is the key. Since higher vibrations only consume and change the lower vibrations, it is not possible to reverse the effects of this law. Lower forces, consumed by negativity, cannot apply this law to lower the frequencies of higher vibrations, for its effects cannot be reversed. It is the law." [Learn More](#)

One uses this law by forgiving others, loving others, seeing in others the differences as well as the similarities, and applying higher frequencies to situations in life that are considered to be discordant."

HAARP was originally a Tesla invention.

The HAARP Project.

“The matters at hand on Earth are serious, concerning weather patterns, electromagnetic fields, and the HAARP project. This is one of many factors that create planetary problems. It certainly is not good timing for the HAARP project to be playing with this energy at this time. The HAARP project will create permanent holes in the ionosphere and in the electromagnetic grids surrounding the planet.”

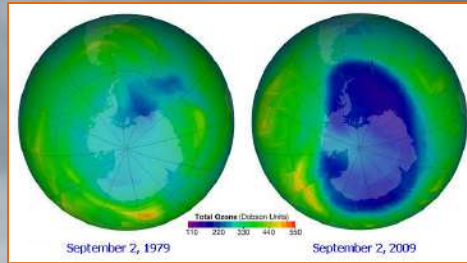

“The destructive effects of the HAARP project will accelerate many Earth changes, and especially promote unstable and violent planetary weather patterns. We can provide a ‘curtain’ energy that temporarily supports the Earth energy field systems, and counteracts the disintegration of these fields. But we cannot provide a permanent reintegration of the planetary energy fields.” [Learn More](#) [View Video “Holes in Heaven”](#)

“A great deal of negative energy has been implanted in the Earth, especially because of nuclear testing. We believe that nuclear testing, more than anything else, has seriously affected your ozone layer, and a form of pressure has developed from the radiation due to nuclear testing, and radiation releases from power plants.

Certain energy waves produced by the radiation strike the ozone layer, creating an energy force that holds back other rays. The balance has been disrupted, allowing for an incongruity in pressures to occur, which has contributed to the holes in the ozone layer.”

“Electromagnetic Rays Weaken The Body Immune Systems.”

The Earth is feeling massive change due to radiation. These changes cause subtle shifts in our body's electromagnetic balance. We see human health issues and mass-extinctions of plants, animals and insects.

Excerpt from: Connecting with the Arcturians

by channel David K. Miller pp.72 – 75

“The Earth’s crust is extremely active.

“Your ability to focus and stay on task is greatly affected by the weather. The overall energy of the Earth is becoming more and more difficult to handle. The gravitational forces on the planet are shifting as the electromagnetic energies of the planet are being realigned. This is causing subtle shifts in your body mechanisms on the planet. You will find that there will be more body problems unless you find a way to sensitize yourselves to the shifts, and successfully work with the energy.”

“We know that being on the Earth is very dense, and we know that there are many molecular problems. The reason some of you are having so many health problems is that there is an ongoing molecular shift on the whole Earth. Part of it is from the toxic pollution that you know about. The other part is due to an actual shift of energy in molecular structure.

“We Need to Tolerate New Electro-magnetic Energies.”

Excerpt from: **Connecting with the Arcturians** by
channel David K. Miller pp.72 – 75

“You must be careful of your exposure to the sun’s rays. Many light workers are preparing to alter your DNA codes so that you can tolerate more of the incoming electromagnetic energy. This will be a good test for your own self-development, as you will need to adapt yourself to this energy. In your meditations, work on allowing your bodies to change to accommodate the new electro-magnetic ultraviolet energy coming in from your sun.”

“This new rate of ultraviolet energy will cause random acts of insanity and mental imbalance in those who are unprepared. The radiation coming in through the holes in the ozone layer also will affect your genetic codes, and some of the keys that have been encoded in you. It is important that you become aware of your genetic structure and codes. When you become weakened by radiation, the codes can become altered or permanently damaged. All these changes are making you more vulnerable to lapses in your personal energy field.”

Big Toys for Big Boys: Making Chaos in the Fabric of Time.

Since the late 1930's the U.S. Government has been testing time travel and invisibility, using Tesla inventions and Einstein theories. The **Philadelphia Experiment** planned to use powerful generators to produce electromagnetic fields and “warp” radar waves, making a ship invisible to radar. In 1943 the Navy ship U.S.S. Eldridge in Philadelphia was made ‘invisible’ with the crew on board. When it was activated, the ship allegedly disappeared, only to reappear in Norfolk Virginia 40 years later, in 1983, as witnessed by a civilian ship crew. But when the U.S.S. Eldridge returned to Philadelphia, some sailors were missing, and many were literally melted into the metal hull of the ship. Those few that survived were delusional. Many were placed in asylums and the whole event was hushed. [Learn More](#)

Top Secret Projects Test the Limits of 3-D Time-Space.

It is said that the Montauk Project was a privately funded defense department project based in Montauk, NY to conduct research in manipulating time and human thought.

Advanced quantum technology was applied to enhance psychic abilities and to build a porthole in time. Working in the 1960's researchers created a stable 'Time Tunnel' allowing them to travel anywhere in space or time, past present or future. [Learn More](#)

Montauk researchers conducted mind control experiments with homeless boys, who underwent physical and mental torture. Many supposedly died and were buried there. The Montauk project invented thought-control implants using music and subliminal messages that we experience today.

Strangely, Montauk researchers could not find a tangible future beyond 2012. There is an abrupt wall at that point, with nothing on the other side. Those who are psychic find that at 2012 there is a barrier beyond which they cannot pass. However, a working time vortex was found into the distant future, and some researchers have already exited the current time dimension, bypassing 2012.

Montauk's bases are believed to have closed in 1983 because of insanity, missing and duplicate persons, entanglements in time loops, duplicate realities, risk of collapse in current 3-D time-space, and invasions of dark forces into the labs from hyperspace.

***Just
Love***

As we make our choices in every moment, we can observe ourselves and others. We simply move our thoughts and actions out of fear and into love.

Our Collective Beliefs Are Powerful.

In this Tug of War, which vibration is winning? Fear or Love?

Fear

Too busy to think
My car
Afraid and sad
Money worries
Me, me me

Help others
We are ONE.
Nice day!
Trust Life

Love & Courage

No fear today!
Plan & expect miracles
Amazing opportunity!
Ready for Love today!
How can I help?
Take a chance on Love!
Calm & balanced
Loving no matter what!
We are strong together
Yes we can!

Our thoughts literally shape physical matter around us. Fear has a very slow vibration, distinct from its opposite emotion, Love. We should be very careful about how we think about our future. If we project fear, our reality will reflect it. Every thought is a spider spinning a web, and grows to become real.

We have
a problem
here...

What if Our Thoughts Choose the Earth's Future Every Moment?

*Love & Courage.
Help others.*

*No Fear today!
Yes we can!*

Plan & expect miracles.

Amazing opportunity!

Ready for Love today?

Take a chance on Love!

*Calm & balanced.
We are strong together.*

Let's Take a Spin Together!

Loving no matter what!

We are strong together!

Hang on Tight!

We are ONE.

Nice day!

I Trust my Life!

No one knows what the future holds. We DO know we manifest our shared thoughts. When all our thoughts are aligned with the common good, change is easy. We can create the desired outcome with our thoughts and vibration level. Are we ready?

Is This a Battle Between Dark and Light in Hyper-Space?

***“Somehow everything works out.
I don't know how. It's a mystery.”***

We are a tiny part of a larger cosmos.

The entire solar system and galaxy have a role. When a dynamic shift takes place in all dimensions at once, some people will be aware of the significance of the change, and others not.

It may be that your mission is to help create a bridge to higher dimensions right here on Earth, so that when the change comes, it will be easy for all, with no shock, upheaval, death or despair. If so, find ways to raise your level of vibration and joy right now. Meditation is most useful. Live in harmony with yourself, others and the Earth. Learn about the truth. Follow the threads of light in yourself.

Follow your intuition. Trust yourself.

Do not succumb to fear.

Put your life in order. Purify your mind and emotions so you can face the truth in that moment.

The End Result is Our Choice.

Truth is Always Stranger Than Fiction.

Like an iceberg, we can see only a small fraction of the whole picture.

Entangled, a new novel By Graham Hancock:

When a drug overdose causes Leoni, a troubled teen from Los Angeles, to have a near-death experience, her soul is flung into a parallel time 24,000 years in the past.

There her fate becomes entangled with Ria, a young Stone Age woman fighting for her life against the evil Sulpa, a powerful demon determined to destroy humanity.

As the invaders annihilate Ria's people, Sulpa moves closer to his ultimate goal: to travel to the 21st century and rule all of mankind in perpetual slavery.

The hour is late and all seems lost. But there is still hope, if Leoni and Ria can meet outside Earth-time. They venture into regions of wonder, master their deepest fears, and fight battles they could never have prepared for, if Sulpa is to be defeated... [**Find Book**](#) [**View Trailer**](#)

Good Versus Evil Makes a Compelling Story

But Higher Reality is Beyond Good and Evil.

Good versus Evil...

"There is no battle between good and evil or between light and dark. There is only power, the right use of power and the abuse of power."

...makes a compelling story.

"It is only through the sustained right use of power that we begin to have the quality of experiences needed to open our minds to a way of living that is based on the energetic reality of intimate interconnectedness and the necessity of diversity to sustain life."

***Higher Reality is beyond Good and Evil.
It is about embracing diversity,
And the unity of all life.***

Existence is a Simple Choice: Service to the Self or Service to the All.

According to the **Law of One**, we have free will in our choices. There is no judgment or concept of good or evil. All beings are free to ascend through the seven levels.

The path of **Service to the All** goes all the way up to the top 7th dimension.

But the path of **Service to the Self** reaches a 'dead end' at the 4th dimension, and can't go up any further without moving to the other path.

The Secret: Activate Intentions with Heart Power.

According to the ***Law of Attraction***, the Universe responds to a thought by bringing it into form. But of hundreds of thoughts, what makes certain thoughts manifest?

1. Have an Idea

1. ***Have an idea.*** Luckily the Universe doesn't respond to every thought. A brain-thought may be rational and logical. But this is not the language of the universe, and it will not hear you.

2. ***Empower your idea in your heart.*** The heart is our most powerful force that speaks loud and clear. Explore the idea in your heart. Is your idea good for ALL of life? How will you FEEL when that idea is realized? When we feel a big ***YES*** resonance, then the most powerful force of heart and spirit is behind us.

2. Empower it in your heart.

***When your heart is activated,
your intentions are filled with power,
and the universe responds immediately.***

Awareness Requires a Clear Mind and Body.

Feeling great is worth cultivating.

Now is the TIME to harmonize our bodies to the changing energetic qualities in the Earth, to notice them and be able to make fine adjustments.

How can we raise our vibration level, sensitize ourselves to feel energy shifts around us, and balance the body without medical intervention?

When the Body-Mind-Consciousness is in tune, everything clicks. But when our body, mind and emotions are challenged, how can we restore balance? How can we find and maintain a flexible equilibrium, when chaos and upheaval are all around us? This is our challenge.

Self-Care is essential to balance and raise our vibration in a chaotic world.

The Energy Body is the Root of Health.

While all healing systems are useful, modern science shows that the energy body is the foundation of health. If this is true, then it follows that we can optimize health by addressing the electro-magnetic connections that are at the root of healthy vibration or disease. When we release old beliefs and negative thoughts, balance toxins, and reframe the energetic system, our bodies can once again find a higher ground of stability and balance.

Chapter 19: What's Your Choice?

Ascension? Rapture? Armageddon? Slavery?

What's Happening Now in the Cosmic Cycles of Time?

It's Just the Shift of the Ages! The ancient calendars are a key to help us understand what is happening now and what we must do. Our ancestors had a different focus. They knew how to live in harmony with the Earth and the cosmos. Ancient civilizations saw TIME in cycles rather than linear. They tracked the 25,920 year cycle, ***The Great Year***.

Many of our modern beliefs about TIME are open to question. The Earth is connected with energetic lines, and we wonder why ancient calendars, pyramids and monuments were built on its crossing points. The ancients understood the universe is holographic: 'As above, so below'. Quantum Science is re-discovering these truths, and thus we are healing the centuries-old schism between Science, religion and our sacred wisdom.

Ancient calendars foresaw a shift in 2012, and left us clues as to the meaning of our current period. We are now discovering that TIME is an illusion, and that 2012 is a moment of total unknown. We know that 'what comes around goes around' and the Mayans show us that time is flexible and multi-dimensional. It can spiral in ever-accelerating cycles, so that 'what goes around comes around' faster and faster. Now we receive instant feedback of our state of mind, and our thoughts become our reality immediately. We learn that our DNA is flexible, triggered by our beliefs. Our minds are truly the key to creating the future.

Summary: Now is the TIME.

As our shared thoughts determine the future of humanity, we find ourselves at a moment of truth and ultimate responsibility. Ancients understood that the universe is made up of levels of vibration called dimensions. We can ascend through these levels to higher awareness and capability right here and now. But passage to higher levels is a test of our understanding of how to live in the light with purity, strength and integrity. Higher levels of existence bring greater responsibility, and we must be ready to pass to the next level.

Will these years be that test? Will we see a cosmic correction?

Our age-old beliefs in duality and good versus evil limit our understanding. Can we accept total diversity and transcend fear collectively? Those who choose to ascend in **service to the all** are somehow always safe. Now is the time to put our lives in order, heal our limited thoughts and reclaim our power collectively and individually. As the cosmos is stirred up and Earth prepares to move to a new way of being, we must prepare for some discomfort. We find new ways to balance our bodies to optimize our health and vibration. Now is the time to meditate, find our hearts, reflect on what is really important, and reach out to others in need. We can dissolve negativity with forgiveness and compassion. The times are exciting and challenging. I am so excited to be alive at this amazing time in our history, that I even forget to fear death. Maybe that's why I had to write this book! **Caterina**

It's the end of the world as we know it, *(and I feel fine)*.

"This book contains seeds of a new vision of reality and Time. This revolution is being led by the changes in human consciousness itself and being reflected in our science. As we have made science into our ultimate voice of authority, when science describes a different world, we have to take note."

"This has far-reaching implications: from understanding the paranormal, to altering political realities, to understanding the very fabric of the cosmos."

Although this may be challenging for some, the intent behind this radical voice is simply to open up possibilities for our world. I hope you enjoyed your journey through this book, and perhaps it has even changed your view of reality.
